

## Toys

How are our toys different to toys in the past?

Year 1 Autumn 2

## **Science**

In science, we will be identifying and classifying a range of materials and their properties; whilst working scientifically.

## **Music**

Music will be delivered by Mr Doherty from Rochdale Music Service.

## **Maths**

In maths, we will be building on our addition and subtraction skills to 10. We will then explore place value to 20. This will include reading and writing numbers to 20, ordering and comparing numbers and finding one more and one less. Through our provision areas in the classroom the children will also be introduced to lessons focusing on length and height and mass and volume of objects.

## **English**

Our book focus this half term is 'Paddington'. We will use this text for a range of writing outcomes. We will be working on using our phonics to segment words for writing and structuring sentences with capital letters, finger gaps and full stops. We will also work on extending our sentences with the use of 'and'. Additionally, we will have daily 'Read, Write Inc' sessions to build on our phonics, reading and writing skills.

## **R.E**

After completing our baptism topic, we will explore advent and Christmas.

## **DT**

We will be learning what wheels and axels are and using our knowledge to create our own moving toy vehicle.

## **History**

We will be exploring how our favourite toys have changed since we were babies. We will then investigate how these are different to our parents/grandparents toys. Also, we will sort old and new toys and look at their similarities and differences; focusing on the teddy bear.
