

Why do people want to go to America?

English

In English, we will be writing in role, thinking about characterisation, using different genres of text to work on formality of tone and we will continue to look at complex sentences. We will be doing much of our work based around the United States and also a very courageous man called Philippe Petit.

Topic

During this topic, we will be using procedural skills as well as conceptual skills to look at physical and human features of places within the United States. We will start off by looking at maps of North and South America and move in to using geographical language to explain our preferences. We will also plan and carry out fieldwork in the local area to compare Middleton, Greater Manchester, to Middletons across America.

RE

Our first week back is Islam Week in school, where we will learn about Ramadan, Eid and the Hajj.

We will then be studying a unit based around the events following Jesus' resurrection and ascension in to Heaven.

Maths

In Maths, we will begin our term with a week on perimeter and area before moving on to shape. We will then do some work on statistics and position and direction. We will continue to do calculation and arithmetic practice.

Life to the Full (RHSE)

We will continue with our RHSE program, but this term we will be concentrating on how God created the Earth for us and how we should be better stewards of it.

We will first look at peer pressure and abuse, and then we will look at aspects of Catholic Social Teaching.

5T Summer 1

PE

PE will continue to be Tuesdays and Wednesdays. Please make sure your child has their PE kit in school and that everything is labelled accordingly.

DT

In DT, we will be studying how bridges are made. We will then be using saws to create our own bridges from wooden beams.

French

We are learning numbers 0-31, days of the week, months of the year and how to say when our birthday is.

Computing

We are continuing to learn to code this half term and create our own apps.
